EDUCATION

SMK HARAPAN BANGSA DEPOK
2022 - 2025 | Computer & Network Engineering

STT NURUL FIKRI DEPOK
2025 | Informatics Engineering

SKILLS

- **Networking:** MikroTik, Cisco
- **Scripting:** Bash, Python
- **Cyber Security:** CTF, Web Security, Hardening Linux, Basic Pentesting
- **Front-End Development:** HTML, CSS, JavaScript, Node.js, Next.js, PHP, Laravel
- **DevOps:** CI/CD, Containers, Kubernetes, AWS (Basic)

CERTIFICATIONS

- MTCNA, MTCRE, MTCTCE
- RH104, RH134, DO188
- IDCAMP – Front-End Path
- IDCAMP – DevOps Path
- RCNA Routing & Switching

ORGANIZATION

Nurul Fikri Cybersecurity Community (NFCC) | Executive Committee – Research & Education
Apr 2026 – Present

- Organized technical workshops and community learning programs.
- Developed educational materials and CTF-based training content.
- Delivered hands-on sessions on Boot-to-Root, Linux Privilege Escalation, and cybersecurity fundamentals.

EXPERIENCE

NXCTF | Founder & Lead Developer
Mei 2026 - Present

- Founded and maintain NXCTF, an open-source CTF ecosystem (100+ GitHub stars).
- Developed NXCTF and NXCTL for CTF deployment and challenge orchestration.
- Built supporting tools including NXBOT (Discord integration) and NXBCL (blockchain launcher).
- Organized and hosted community CTF events including FGTE 0 and CTF FGTE (Flag Gate).
- Lead architecture, infrastructure, and feature development across the NXCTF ecosystem.

PT ESTRADA | Junior Network Engineer (Freelance)
Febuari 2026 (1 months)

- Performed staging and provisioning of network devices (HSA 520, XE 300) prior to site deployment
- Configured and validated devices using automation tools (mbox / mfusion)
- Ensured devices were fully operational and ready for deployment
- Conducted basic troubleshooting during provisioning and configuration process

PT Jarvis Integrasi Solusi | IT Support (Internship)
Juli - Agustus 2024 (2 months)

- Assisted in hardware and software troubleshooting for end-users
- Installed and configured operating systems and applications
- Supported basic network maintenance and ensured system availability
- Provided technical support and resolved IT-related issues

AWARD

- 1st Place Winner - LKS cyber security tingkat kota depok | Apr 2024
- 2nd Place Winner - LKS cyber security tingkat provinsi jawa barat | Mei 2024
- 3rd Place Winner - Olimpiade Jaringan MikroTik tingkat Nasional | Okt 2024
- 1st Place Winner - Mikrotik Compile XV | Universitas Bakrie | Feb 2025
- 3rd Place Winner - INACOMP1.0 Networking | Jun 2025
- 2nd Place Winner - E-Time Network Competition | Jul 2025
- 1st Place Winner - Astro CTF 7.0 - 2025 | Des 2025

PROJECTS

NXCTF – Modern Capture The Flag (★ 135+, 📄 11+)

A lightweight CTF platform built using Vercel and Supabase, designed for creating and hosting security challenges.

Demo: <https://demo.nxctf.my.id/> SC: <https://github.com/nxctf/nxctf>

HPONE – Docker HoneyPot Manager (★ 95+, 📄 1)

A Docker-based honeypot management system for deployment, monitoring, and automated security environments.

SC: <https://github.com/ariafatah0711/HPone>

NXCTL - CTF Challenge Orchestrator

Modern tooling for running containerized CTF challenges with automated tunnels, TTL controls, and a practical CLI..

SC: <https://github.com/nxctf/nxctl>
